Soundweb™ London
BLU-BOB1 and BLU-BOB2
Installation Guide

18-0670-C
The symbols shown above are internationally accepted symbols that warn of potential hazards with electrical products. The lightning flash with arrowpoint in an equilateral triangle means that there are dangerous voltages present within the unit. The exclamation point in an equilateral triangle indicates that it is necessary for the user to refer to the owner’s manual.

These symbols warn that there are no user serviceable parts inside the unit. Do not open the unit. Do not attempt to service the unit yourself. Refer all servicing to qualified personnel. Opening the chassis for any reason will void the manufacturer’s warranty. Do not get the unit wet. If liquid is spilled on the unit, shut it off immediately and take it to a dealer for service. Disconnect the unit during storms to prevent damage.

**SAFETY INSTRUCTIONS**

**NOTE FOR CUSTOMERS IF YOUR UNIT IS EQUIPPED WITH A POWER CORD.**

**WARNING:** THIS APPLIANCE SHALL BE CONNECTED TO A MAINS SOCKET OUTLET WITH A PROTECTIVE EARTHING CONNECTION.

The cores in the mains lead are coloured in accordance with the following code:

- **GREEN and YELLOW** - Earth
- **BLUE** - Neutral
- **BROWN** - Live

As colours of the cores in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

- The core which is coloured green and yellow must be connected to the terminal in the plug marked with the letter E, or with the earth symbol, or coloured green, or green and yellow.
- The core which is coloured blue must be connected to the terminal marked N or coloured black.
- The core which is coloured brown must be connected to the terminal marked L or coloured red.

This equipment may require the use of a different line cord, attachment plug, or both, depending on the available power source at installation. If the attachment plug needs to be changed, refer servicing to qualified service personnel who should refer to the table below. The green/yellow wire shall be connected directly to the unit’s chassis.

**WARNING:** If the ground is defeated, certain fault conditions in the unit or in the system to which it is connected can result in full line voltage between chassis and earth ground. Severe injury or death can then result if the chassis and earth ground are touched simultaneously.

**POWER ON/OFF SWITCH:** For products provided with a power switch, the power switch does not break the connection from the mains.

**MAINS DISCONNECT:** The plug shall remain readily operable. For rack-mount or installation where plug is not accessible, an all-pole mains switch with a contact separation of at least 3 mm in each pole shall be incorporated into the electrical installation of the rack or building.

**FOR UNITS EQUIPPED WITH EXTERNALLY ACCESSIBLE FUSE RECEPTACLE:** Replace fuse with same type and rating only.

**MULTIPLE INPUT VOLTAGE:** This equipment may require the use of a different line cord, attachment plug, or both, depending on the available power source at installation. Connect this equipment only to the power source indicated on the equipment rear panel. To reduce the risk of fire or electric shock, refer servicing to qualified service personnel or equivalent.

If connected to a 240V supply, a suitable CSA/UL certified power cord shall be used for this supply.

**POWER ADAPTER:** Ensure a minimum of 8 inches of clearance and ventilation around the adapter.

---

**U.K. MAINS PLUG WARNING**

A molded mains plug that has been cut off from the cord is unsafe. Discard the mains plug at a suitable disposal facility. NEVER USE ANY CIRCUIT BREAKERS TO INSERT A DAMAGED OR CUT MAINS PLUG INTO A 13 AMP POWER SOCKET.

Do not use the mains plug without the fuse cover in place. Replacement fuse covers can be obtained from your local retailer. Replacement fuses are 13 amp and MUST be ASTA approved to BS1362.

**ELECTROMAGNETIC COMPATIBILITY**

This device complies with part 15 of the FCC Rules and the Product Specifications noted on the Declaration of Conformity. Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- This device must accept any interference received, including interference that may cause undesired operation.

Operation of this unit within significant electromagnetic fields should be avoided.

- use only shielded interconnecting cables.

**IMPORTANT SAFETY INSTRUCTIONS**

Conforms to the following Product Specifications:

- Safety: IEC 60665 -01 + Amd. 1
- EMC: EN 55022:2006
- Safety: EN 55024:1998
- FCC Part 15
- EN 55022:2006
- EMC: EN 55022:2006
- Safety: IEC 60065 -01 + Amd. 1
- Specifications:
  - EN60742, or equivalent.

**SAFETY INFORMATION**

**CAUTION**

**RISK OF ELECTRIC SHOCK DANGEROUS TO LIFE**

**NOTICE FOR CUSTOMERS**

- This device complies with part 15 of the FCC Rules and
- Operation is subject to the following two conditions:
  - This device may not cause harmful interference, and
  - This device must accept any interference received, including interference that may cause undesired operation.

Operation of this unit within significant electromagnetic fields should be avoided.

- use only shielded interconnecting cables.

**DECLARATION OF CONFORMITY**

Manufacturer’s Name: BSS Audio

Manufacturer’s Address: 8760 S. Sandy Parkway
Sandy, Utah 84070, USA

declares that the product:

Product name: BLU-BOB1, BLU-BOB2
Note: Product name may be suffixed by the EU.

Product option:
all (requires Class II power adapter that conforms to the requirements of EN60065, EN60742, or equivalent.)

conforms to the following Product Specifications:

- Safety: IEC 60665 -01 + Amd. 1
- EMC: EN 55022:2006
- Safety: EN 55024:1998
- FCC Part 15

Supplementary Information:

The product herewith complies with the requirements of the:

- Low Voltage Directive 2006/95/EC
- EMC Directive 2004/108/EC
- RoHS Directive 2002/95/EC
- WEEE Directive 2002/96/EC
- EN 55022:2006
- EN 55024:1998
- IEC 60065 -01 + Amd. 1

With regard to Directive 2005/32/EC and EC Regulation 1275/2008 of 17 December 2008, this product is designed, produced, and classified as Professional Audio Equipment and thus is exempt from this Directive.

### 12VDC Power Adapter
The BLU-BOB Break-Out Box output expanders are powered by a 12V DC adapter that is included with the device. Use only the adapter provided.

### BLU link In/Out
The Soundweb London Digital Audio Bus is a high bandwidth, fault-tolerant bus of 256 channels at 48kHz and 128 channels at 96kHz. Devices are connected, using Cat 5e or Cat 6 cable, in a ring from the OUT connector of one device to the IN connector of the adjacent device. The distance between devices in the ring can be up to 100m on Cat 5e or Cat 6 or up to 10km on single mode fiber using the MC-1 fiber media converter. The ring topology allows any single cable fault without loss of channels. All devices within a given Digital Audio Bus ring must be configured for the same sample rate. The sample rate of the BLU-BOB1 and BLU-BOB2 devices is automatically configured based on remotely configured devices within the Digital Audio Bus ring.

### Channel Select
The BLU-BOB output channels are easily configured by six DIP switches located on the rear of the device, which select a range of 8 consecutive channels from the Digital Audio Bus. Output channel assignments are configured by DIP switch selection only. The BLU-BOB is not configured by HiQnet™ London Architect.

### Analog Output 1-8
The 8 analog line level outputs utilize the same terminal block connectors as the other members of the Soundweb London family.
**TECHNICAL SPECIFICATIONS:**

**Front Panel LED Indicators:** Signal present per output, and Power

**Analog Outputs:** 8 electronically balanced on Phoenix/Combicon removable screw connectors

**Maximum Output Level:** +19dBu

**Frequency Response:** 20Hz-20KHz (+0.5dB/-1dB)

**THD:** <0.01% 20Hz to 20KHz, +10dBu output

**Dynamic Range:** 110dB typical, 20Hz-20KHz unweighted

**Crosstalk:** <-105dB 20Hz-20KHz

**D/A Latency:** 28/fs (0.58ms@48k, 0.29ms@96k)

**Digital Audio Bus:**

- **Connectors:** 2 x RJ45 Ethernet connectors
- **Maximum Cable Length:** 100m/300ft on Category 5e cable between devices
- **Maximum Number of Nodes:** 60
- **Latency Per Node:** 4/fs (0.08ms@48k, 0.04ms@96k)

**Power and Dimensions:**

- **Power Supply:** 12VDC external adapter (included)
- **AC Power Input to Adapter:** 19W
- **BTU Rating:** 65 BTU/hr
- **Operating Temperature Range:** 5 (41) to 35 (95) degrees C (degrees F)
- **Dimensions BLU-BOB1 (H(U) x W x D):** 1.65” (1U) x 8.63” x 7.75” (42mm x 219mm x 197mm)
- **Dimensions BLU-BOB2 (H(U) x W x D):** 1.75” (1U) x 19” x 7.75” (45mm x 483mm x 197mm)
- **Weight BLU-BOB1:** 2.96 lbs / 1.34 kg
- **Weight BLU-BOB2:** 5.13 lbs / 2.33 kg
